

# 7710-Urethane Reducer Fast

# 7720-Urethane Reducer Medium

# 7730-Urethane Reducer Slow

## Technical Data

Color: Clear

Reducer: 7710 Fast  
7720 Medium  
7730 Slow

\* Additional information such as Mix Ratio, Pot Life, Dry Time and VOC are PMR (Per Manufacturer Recommendations) of the specific color system that is being used with High Teck urethane reducers.

Designed for use in almost any brand of primer, basecoat, or clearcoat where a urethane grade reducer is required. High Teck urethane reducers provide outstanding metallic control and provide brilliant gloss and superior leveling.

---

### Features:

- 100% Virgin Solvents
- Produces Brilliant Gloss and Superior Leveling
- Provides Outstanding Metallic Control

### Advantages:

- Less Clearcoat Buffing
- Maximum Holdout
- Versatile

### Benefits:

- Increased Productivity
  - Best Final Results
  - Fits Most Shop Conditions
- 

### Special Instructions

1. Follow Manufacturers recommendations for mixing, application and flash time information
  2. Once opened, tightly seal closure after each use
-
